

ELVIN COOPER

Oracle / PL/SQL Developer | Python Backend & Systems Integration

La Romana, Dominican Republic | Open to Remote Opportunities | 809-250-1339 | ing.elvin01cooper@gmail.com

Portfolio: elvindev.dev | LinkedIn: elvin-cooper | GitHub: ElvinCooper

PROFESSIONAL SUMMARY

Software Developer with over 4 years of professional experience in Oracle-based enterprise applications, including SQL, PL/SQL, Forms and Reports. Experienced in transactional systems, SQL optimization and business application support. Complemented by practical Python/FastAPI backend development, REST APIs, PostgreSQL, Docker, automated testing, CI/CD, Linux and AI-assisted development with coding agents and MCP.

TECHNICAL SKILLS

Oracle & Enterprise: Oracle Database, SQL, PL/SQL, Oracle Forms, Oracle Reports

Backend: Python, FastAPI, Flask, REST APIs, SQLAlchemy, SQLModel, JWT

Data: Oracle, PostgreSQL, SQLite | Testing: Pytest, Ruff

DevOps & Server: Docker, Docker Compose, Git, GitHub Actions, CI/CD, Ubuntu Server, Linux CLI, SSH

AI-Assisted Development: OpenCode, AI Coding Agents, MCP, AGENTS.md, Skills

PROFESSIONAL EXPERIENCE

Programmer Analyst — Central Romana Corp. | May 2022 – Present | Dominican Republic

- Develop and maintain enterprise transactional applications using Oracle SQL, PL/SQL, Forms and Reports.
- Optimize SQL queries and database processes for efficient handling of large business data volumes.
- Implement and support functionality aligned with business requirements and established application logic.
- Developed and maintained a Linux-based scheduler that monitors Oracle data at scheduled intervals and sends processed data to an external system through a REST API.

Independent Backend Projects — Python | Apr 2024 – Present

- Design and develop REST APIs with Python, FastAPI and Flask, using SQLAlchemy/SQLModel and JWT in selected projects.
- Build solutions integrating Oracle and PostgreSQL, with Pytest, Git, Docker and GitHub Actions/CI/CD workflows.

SELECTED PROJECTS

Customer Portfolio System | Oracle Database · PL/SQL · FastAPI · Docker · Pytest · GitHub Actions

- Integrated Oracle business logic with a FastAPI REST API using PL/SQL procedures, functions, triggers and views; applied testing, Docker and CI/CD.

Oracle Database MCP Server | Python · MCP · python-oracledb · Thick Mode · Oracle 11g · Pytest · GitHub Actions

- Developed a local MCP server for AI coding agents to interact with Oracle environments, supporting multiple connections, connection pooling, read-only query validation and controlled writes.

EDUCATION & CERTIFICATIONS

- B.S. in Systems and Computing Engineering — Universidad Dominicana O&M, Dec 2016
- GitHub Actions CI/CD Bootcamp — Código Facilito, Sep 2025
- Docker Course — Código Facilito, Nov 2025
- Backend Development with Python — Udemy, May 2023
- Git and GitHub Course — Alura Latam, May 2023
- Introduction to Programming Bootcamp — Alura Latam, Apr 2022
- Linux Essentials — Cisco Networking Academy, In Progress
